UNITED STATES AND JAPAN. Despite official reticence information from rel'able sources has been obtained of an agreement of far-reaching importance between the United States and Japan covering the policy of the two countries in the Pacific. The sgreement is based upon the idea of encouraging and defending free and praceful commer-cial development in the Pacific. It contains not only a mutual guarantee to respect cath other's territorial possessions there, but defines the at itade of the two countries toward China, binding each to defend by every pesceful means. China's independence and integrity, and to give equal commercial opportunity in the Chinese Empire to all nations. But more important still, the agreement, in the event of complications threatening the status quo, binds the United States and Japan to consuit each other, with a view to acting together. The agreement has been drawn up in the form of a decla-ration consisting of five articles, embodying substantially what is s'a'ed above.
